CHOOSE GOOGLE CLOUD AS SERVICE PROVIDER to avoid using your card details requirement in the below step

1 Enter the basic details

Database Name

cdac

Give it a memorable name - this can't be changed later.

Keyspace Name

lms

Want to know more? [Read our Docs](#) to learn more about keyspaces.

Current Plan

Free

You're currently on our free plan, which gives you free credits monthly. That recurring credit should be more than sufficient for your development needs, running sample code or apps, building proof-of-concepts, hackathon participation – even running small production workloads.

[Request a New Region](#)

Woohoo! You just created a new database. While it's deploying, grab your token so you can access it later.

Save your secure token details

Here's your auto-generated token for this database. It's got [the default permissions](#) assigned to it. Store it somewhere safe - it's your key to accessing this database.

⚠ Save your auto-generated token and keep it somewhere safe. You can always [generate a new token](#), but you won't be able to access this one later.

Your Token

```
{
  "clientId": ".....",
  "clientSecret": ".....",
  "token": "....."
}
```

[Download Token Details](#) ⬇

cdac-token.json (1KB)

cdac

Finishing up..

Database Details

Name cdac
Keyspace lms
Provider Google Cloud
Region asia-south1
